DETAILED ACTION

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

- 2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Dougles D. Fekete on February 9, 2007.
- 3. The application has been amended as follows:

In claim 19, line 10, after a desired channel—a digital-to-analog converter (DAC) coupled to the output of the source decoder, the DAC converting a digital audio signal associated with the desired channel to an analog audio signal for playback—has been added.

Claim 22 has been deleted.

4. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach a human-machine interface (HM1) coupled to the source decoder. Wherein the HMI is configured to allow an operator to change to a desired channel and a digital-to-analog converter (DAC) coupled to the output of the source decoder, the DAC converting a digital audio signal associated with the desired channel to an analog audio signal for playback. This limitation, in conjunction with all other limitations, has not been disclosed, taught or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
